EDUCATION

Northeastern University, College of Engineering

Master of Science in Engineering Management - GPA: 3.76 / 4.00

Boston, MA

Sep 2024 - Aug 2026

University of Mumbai, Ramnarain Ruia Autonomous College

Bachelor of Science in Computer Science - GPA: 3.82 / 4.00

Mumbai, MH

Jun 2017 - Mar 2020

SKILLS & CERTIFICATIONS

Management: Agile Methodology (Scrum, XP, Kanban), Product Road mapping, Stakeholder Management, Customer Needs Analysis, Quality Assurance, Competitive Research Analysis, A/B Testing, Deliverables Tracking

Tools & Platforms: JIRA, Confluence, Microsoft Office, Figma, GitHub, Jenkins, MS Project, Minitab, Postman, Linear, Notion

Software Development: Java, Python, React.js, Spring Boot, PostgreSQL, MySQL, Object Oriented Programming, RestAPI

Certifications: Software Product Management Specialization; Agile Software Development; AWS Certified Cloud Practitioner

PROFESSIONAL EXPERIENCE

Northeastern University Information Technology Services

Boston, MA

Digital Product Lead

Feb 2026 - Present

- Shipped **6 features in 2 months** by leading **client discovery sessions**, translating ambiguous university stakeholder requests into **scoped deliverables**, and coordinating execution across a **team of 5**, improving **feature sign-off rates** and **client satisfaction**.
- Embedded **AI tooling (Claude Code, GitHub Copilot)** into the **end-to-end delivery pipeline** to accelerate **UI prototyping** and **feature implementation**, improving **release velocity** and validating outputs against **client-defined acceptance criteria**.

NEXT Consulting (Client: Verizon, Via Separations)

Boston, MA

Technical Project Manager

Jul 2025 – Dec 2025

- Owned **product roadmap** and **go-to-market strategy** for an **AI/ML-powered** churn analytics platform, applying **MoSCoW prioritization** to translate ambiguous business goals into **OKR-aligned epics** and **sprint-ready backlogs**.
- Delivered **5+ high-impact features 100% on time** by closing the **voice-of-customer loop** through **user interviews**, synthesizing insights into **RICE-prioritized backlogs**, and validating requirements across engineering and design before sprint commitment.
- Established a **scalable product documentation framework** covering data flows, API behaviors, and UI specifications, **eliminating cross-team ambiguity** and enabling **3 engineering squads** to execute functional changes independently.
- Reduced project escalations by **40%** by acting as **Scrum Product Owner**, facilitating **sprint ceremonies**, **backlog refinement**, **Go/No-Go release decisions**, and **10 + executive demos** that translated technical progress into clear business outcomes.
- Reduced an 8-hour manual analysis workflow to **under 15 minutes** by defining **north star metrics** and a **KPI framework** tied to **product OKRs**, enabling proactive operational monitoring validated through engineering and executive sign-off.
- Accelerated **cross-functional execution by 20%** by collaborating with design and engineering teams through **Figma prototype reviews** and early requirements validation, measured by **sprint velocity improvements**.
- Increased feature adoption by 35%** for a learning platform with **7,200+ enrollments** by leading **post-launch GTM analysis**, tracking success metrics against **OKRs**, and driving iterative UX improvements validated through user engagement data.

Capgemini Technology Services India Limited (Client: Mercedes-Benz Research and Development India)

Mumbai, MH

Associate Consultant

Oct 2020 - Jul 2024

- Drove end-to-end product lifecycle** for **autonomous vehicle diagnostic** and R&D software, improving user experience by **30%** by translating safety-critical requirements into prioritized features and driving execution across engineering, QA, & business teams.
- Led data-driven roadmap prioritization** by analyzing failure modes, defect trends, and **production metrics**, **reducing bug reports by 15%** through structured backlog management, release validation, and **Agile execution**.
- Defined and **validated high-reliability system requirements and acceptance criteria**, **improving system stability by 20%** by partnering closely with engineering on architecture decisions and performance optimization.
- Established scalable **Confluence documentation practices**, improving team efficiency and cross-team visibility by **30%**.

PROJECT EXPERIENCE

Reimagining Google Maps for the Visually Impaired (Team)

Oct 2024 - Nov 2024

- Designed and proposed three innovative features to enhance accessibility in navigation for visually impaired users, supported by **market research**, and **user interviews** at the **Massachusetts Commission for the Blind**, competitive analysis, and **prototypes**.
- Secured **Second Runner-Up** among **150+ teams** at Protothon 6.0 (Product Hackathon), evaluated by industry leaders.

Technical PM Copilot (Team)

Feb 2026 - Apr 2026

- Shipped a multi-agent AI system**, combining **LangGraph** orchestration, **RAG pipeline**, and **hallucination guardrails** to reduce compliance assessment across 6 markets from hours to 12 seconds at **100% routing accuracy**.
- Owned LLM routing strategy and prompt engineering across 5 agents**, cutting inference cost ~15x through task-specific model selection and delivering a production React frontend with **agentic workflows** for architecture analysis and global launch readiness.
